

Vision: Maximizing the Performance of Surgical Facilities

Built on market innovations, Vision sets an elevated standard in surgery center management software, meeting the needs of highly specialized ambulatory surgery centers (ASC) and surgical hospitals.

This web-enabled technology provides one advantage after another, seamlessly integrating clinical and administrative processes. Vision provides security, scalability, integration with third-party systems and flexibility for growth – while offering continuous benefits.

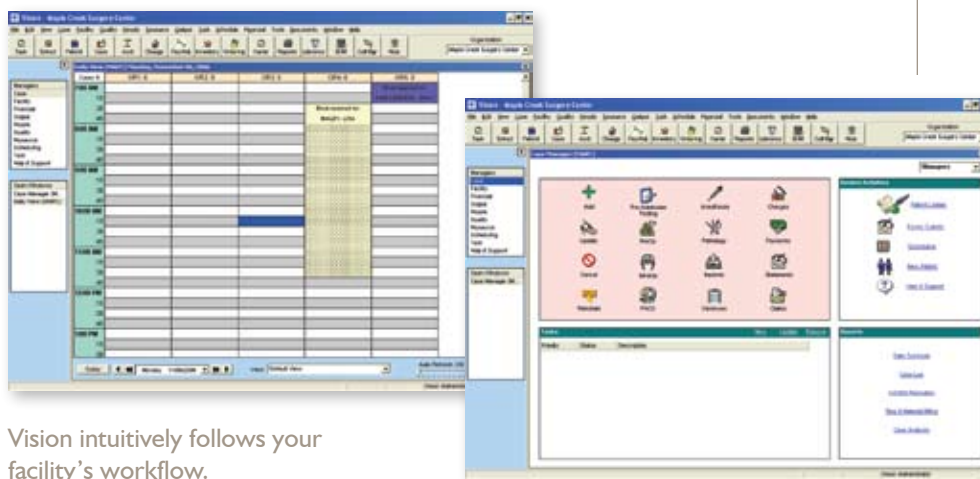

- Minimal maintenance and investment
- Flexible deployment and optional enterprise capabilities
- Forward-looking industry standard protocols
- Rich Internet application

SourceMedical's Vision software continually improves care and adds unique services, providing facilities the option to purchase only those components they require, and the availability to build in additional functionalities when needed.

- Vision EHR
- Anesthesia billing
- Collections manager
- Improved reporting, including regulatory and FASA reports
- Output reports manager
- Electronic document management
- Workflow manager
- Insight ad hoc reporting tool
- Integration manager
- SourcePlus WebSuite
- SourcePlus EdgeSurvey
- SourcePlus Business Intelligence
- SourcePlus PrescriptionCenter
- SourcePlus PurchaseConnection PCX and PCX Elite

Vision: Seamless Integration of Clinical and Administrative Processes

Packed with comprehensive end-to-end functionality, Vision optimizes facility management, increases productivity and operational efficiency, accelerates cash flow, and enhances quality of care and patient safety. Whether you are a freestanding facility or part of a corporate network, Vision's enterprise-wide system intuitively follows your facility's workflow, increasing cash flow, boosting productivity and reducing costs, all while helping you proactively manage your business.

Vision intuitively follows your facility's workflow.

Vision: Incorporating Various Modules

Schedule Manager

Designed to improve and enhance the scheduling of patients, procedures, supplies, personnel and pre-admission testing.

Clinical Manager

Efficiently captures all case-related information including pre-op and post-op procedure and diagnosis codes, surgeon and staff utilization, supplies, instrument and equipment usage, case times and quality assurance metrics.

Vision EHR

Vision EHR is the only electronic health records solution that provides consistent workflow within your core ASC application. This single database solution offers a highly customizable user interface that allows your facility to convert existing forms to an electronic format – offering the ability to make quick changes when necessary without interrupting current workflow.

Financial Manager

Offers innovative financial and administrative capabilities that improve overall revenue cycle management.

Inventory Manager

Vision's Supply Chain Management tools automate manual processes and improve order and contract data management.

Vision EDM

Vision's document management tools allow documents to be captured across all business and clinical processes and integrated directly into the workflow, improving productivity, reducing costs and increasing revenue.

Workflow Manager

Allows Vision administrators to assign tasks to individual users to ensure timely completion of key documentation.

Integration Manager

Provides seamless integration between a variety of systems and applications, allowing you to efficiently share information as needed.

Output Reports Manager

Vision leverages state-of-the-art tools to offer flexible, interactive reporting and analysis capabilities that deliver complete and accurate data at a moment's notice.

Insight Ad Hoc Reporting

Vision's InSight Ad Hoc Reporting is a powerful, XML-based Web application that allows all levels of users to create and view their reports via a browser-based wizard. Administrators enjoy easy set-up and configuration with an intuitive Web-based administrative module to define security, data relationships, application settings and more.

SourcePlus WebSuite

An innovative web-based approach to mastering efficiency and control of surgeons' schedules and cases, providing the surgery center the level of control and security they need.

SourcePlus EdgeSurvey

An online patient satisfaction measurement and benchmarking service using a combination of electronic and paper surveys to gather feedback.

SourcePlus Business Intelligence

Improves the way facilities operate and make decisions by providing access to critical patient, clinical, provider, inventory, and financial information.

SourcePlus PurchaseConnection

Maximizes supply chain efficiency, by leveraging the Internet to connect the facility with its primary distributors and vendors.

SourcePlus PrescriptionCenter

A complete turnkey outpatient prescription medication dispensing system installed at the surgery center. This breakthrough technology includes multiple safety checks and provides fast, convenient, accurate dispensing of medication every time.

About SourceMedical

SourceMedical provides outpatient information solutions and services for ambulatory surgery centers, surgical hospitals and rehabilitation clinics nationwide. With a nearly 30-year track record and more than 4,100 satisfied customers, SourceMedical is the trusted source for innovative applications, in-depth industry expertise and unsurpassed customer service. The company's unique, end-to-end systems improve operational efficiency and cash flow while enabling healthcare facilities to deliver a higher standard of patient care.
