

Online Patient Medical History Saves Time and Costs for Surgical Facilities and Provides Greater Convenience for Patients

Increasing efficiency, streamlining workflow and improving patient care - top priorities for every surgical facility. What makes these advances possible? Frequently, it is the application of new, innovative technologies.

Through a partnership with Medical Web Technologies (MWT), SourceMedical now offers SourcePlus Passport. This unique, online solution allows patients to submit their complete medical information to a facility prior to their procedure. This turns lengthy nursing pre-op phone calls into a single, short phone call to simply verify a patient's information, saving an average of 22 minutes of clinical staff time per case. The patient's final documentation is automatically sent back to your SourceMedical system and tied to the patient's case. Vision EHR customers can also bring the document directly into the patient's chart. The result: better patient satisfaction, greater staff productivity, and documentation that is legible, uniform and complete.

SourcePlus Passport simplifies clinical documentation by integrating electronic medical forms generated during the pre-operative process into core management systems.

SourcePlus Passport enables facilities using SourceMedical's Vision, Vision EHR and AdvantX management systems to have finalized patient information automatically sent back to AdvantX or Vision and tied to the patient's case. This new level of integration simplifies the clinical documentation management process and ensures all patient information is consistent and in one place.

Instant access to patient information is essential and this integration allows our AdvantX and Vision clients to take full advantage of the value SourcePlus Passport provides by leveraging the electronic documentation generated during the pre-operative process and tying it to patients' cases. In doing so, facilities are empowered to manage patient information in a way that improves productivity and profitability while enabling them to enhance the quality of care they deliver."

SourcePlus Passport provides your facility with:

- Substantial cost and time savings – save an average of 22 minutes of clinical time per case, allowing your staff and nurses to focus on patient care rather than on routine data gathering and entry
- Better communication between patients and surgical offices
- Fewer delays and cancellations
- Minimized wasted time between cases
- Improved documentation that is legible, accurate, and uniform
- Greater patient convenience and satisfaction
- Supports your facility in meeting CMS Patient Rights requirements and other government mandates

SourcePlus Products and Services: Solving problems and boosting performance

The SourcePlus suite includes a wide array of add-on modules, products and services that add value to our core information management systems and further enhance facility management, clinical efficiency and profitability. With our integrated SourcePlus Products, your surgical facility can leverage the best tools available to ASCs and surgical hospitals.

Benefits include:

- Improve service to patients and physicians
- Optimize reimbursement and cash flow
- Improve clinical documentation
- Boost staff productivity
- Reduce staff and supply costs
- Improve decision-making
