

## Automatic payment posting tool enables your ASC to gain efficiencies and reduce payment errors

---

With SourceMedical's SourcePlus AutoPost module, your ASC has the ability to automatically post payments and adjustments received from primary and secondary payers in the HIPAA compliant 835 electronic transaction file format.

SourcePlus AutoPost performs multiple layers of matching and conflict checking to ensure payments are applied to the correct accounts, dates of service and procedures. Our posting solution also includes a reconciliation process to assist in identifying any payments that must be posted manually.

Available for use with several of SourceMedical's preferred clearinghouse partners, SourcePlus AutoPost is perfect for any ASC using SourceMedical's AdvantX or Vision software that wants to:

- Automate the time-consuming, manual payment posting process
- Reduce errors resulting from payments being applied to incorrect accounts
- Expedite the transfer of outstanding balances to patients and secondary payers

AutoPost is designed to work with several contract options, including applying the write-off to the ledger at the time of charge entry, or at the time of payment posting.

- When the write-off is taken at the time of charge entry, AutoPost validates that the write-off in the remittance file matches the adjustment in the ledger, and will not apply the write-off to the ledger. Instead, it will create the claims adjudication entries
- When the write-off is taken at the time of payment posting, AutoPost creates the write-off in the ledger, as well as the claims adjudication entries

These options ensure that AutoPost provides your facility with the greatest possible automation, maximizing your staff efficiency and productivity.

SourcePlus AutoPost is integrated with our complete suite of revenue cycle management tools, enabling your facility to automate the entire spectrum of patient and payer business transactions, improving cash flow and productivity while reducing A/R days and billing errors.

*"SourcePlus AutoPost has enabled us to significantly simplify our payment posting process. By automating what was historically a time consuming and often error-prone process, we have been able to improve our productivity while reducing A/R days and billing errors."*
