

## Vision EHR: Seamless Integration, Clinical Flexibility

Offering seamless integration, Vision EHR is the only electronic health record that provides consistent workflow within your core ASC application. This single database solution offers a highly customizable user interface that allows your facility to convert existing forms to an electronic format — offering the ability to make quick changes when necessary without interrupting current workflow. Staff can focus on patient care by entering data quickly and easily at the patient point-of-care — improving the quality of care while saving your facility time and money.

### Vision EHR: Exceeding Expectations

- Follows typical ASC workflow including Pre-Op, Intra-Op, and Post-Op
- Fully integrated into the Vision application
  - All data is maintained within one database
  - Minimal training as navigation remains the same as the Vision application
  - Centralized administration, chart management, security and reporting
- Provides real-time connectivity to the Vision application through wireless tablets
- Allows immediate data entry and synchronized updates at the patient's bedside
- Offers rich form and chart pack customization, including the ability to auto-populate charts with forms based on specialty, provider, and/or procedure
  - Allows facilities to continue using form content their staff already uses, but in an electronic format
  - Comprehensive form creation to accommodate any facility size or specialty mix
- Includes an extensive, embedded drug database, providing:
  - Drug-to-drug conflict checking
  - Drug-to-allergy conflict checking
  - Drug interaction checking with other variables, such as age, pregnancy, and lactation
  - Patient-friendly educational materials related to medications and drug interactions available in multiple languages
- Imports high-quality external documents including images and physician notes
- Allows users to sign off on forms with electronic signature
- Internal messaging supports secure communication among facility staff and clinicians
- Audit trail reporting supports HIPAA compliance measures
- Flexible chart search features allow users to quickly and easily locate charts to ensure timely chart completion, facilitate medical record requests, and support peer review and other QA processes

### Vision: Seamless Integration of Clinical and Administrative Processes

Packed with comprehensive end-to-end functionality, Vision optimizes facility management, increases productivity and operational efficiency, accelerates cash flow, and enhances the quality of care and patient safety. Whether you are a freestanding facility or part of a corporate network, Vision's enterprise-wide system intuitively follows your facility's workflow, increasing cash flow, boosting productivity and reducing costs, all while helping you to proactively manage your business.
