

Enhanced functionality through better inventory management and supply chain forecasting

SourcePlus PCX Elite

PCX Elite offers an advanced supply chain solution that will help automate many non-value add activities around managing inventory within a surgery center.

Surgery centers find a quick return on investment (ROI) with the PCX Elite solution. It's offered at a monthly subscription fee which means no large capital budget is needed and the system can pay for itself within a couple of months.

Key PCX Elite Features

- Technology Platform - Industry leading Microsoft.NET; Secure, scalable and relatively inexpensive to deploy.
- PAR Management - Provides the means to streamline and simplify the process of maintaining par areas and performing cycle counts.
- Accounts Payable - A 3-Way match of invoices against purchase orders and receipts, minimizing time spent matching invoices to paper purchase orders.
- Mobile Handheld Scanner - Supports the latest technology in Pocket PC devices, users can synchronize key inventory data between the online application and the handheld.
- Inventory Control - Allows users to maintain inventory at one location or multiple locations and provides accurate, real-time information at your fingertips. Products can be tracked by lot number, serial number or expiration date to ensure the right product and quantity is delivered to the correct location.
- Financial System Integration - Integrates with many of the leading accounting and financial systems on the market.

SourcePlus PCX Elite is an enhanced materials management solution, available only with the Vision and AdvantX software that helps to maximize the surgical facilities supply chain procedures. The browser based application provides a secure and reliable platform for collaborative Just-In-Time (JIT) and Low-Unit-Of-Measure (LUM) inventory management and supply chain forecasting.

SourcePlus PCX Elite automates a significant portion of a surgical facilities procurement process; thereby eliminating many of the errors that can occur when using traditional manual processes. This affordable solution offers low implementation and maintenance impact for your facility, making it an easy choice to integrate into your current system.

SourcePlus Products and Services: Solving problems and boosting performance

The SourcePlus suite includes a wide array of add-on modules, products and services that add value to our core information management systems; further enhancing facility management, clinical efficiency, quality and profitability. With our integrated SourcePlus Products, your surgical facility can leverage the best tools available to ASCs and surgical hospitals.

Benefits include:

- Improve service to patients and physicians
- Optimize reimbursement and cash flow
- Improve clinical documentation
- Boost staff productivity
- Reduce staff and supply costs
- Improve decision-making

SourcePlus PCX

Maximize Your Supply Chain Efficiency

For surgical facilities, extensive cost saving opportunities lie in the extension of supply chain management tools and techniques at the point of care, completing the link between demand and supply.

Because inventory availability and management is so critical to your business, Source Medical offers a web-based supply chain solution that helps simplify the ordering process, speeds product availability, improves inventory levels and reduces labor and other costs.

Designed exclusively for ambulatory surgical centers, surgical hospitals and practices, SourcePlus PCX maximizes the supply chain from manufacturer – to distributor – to surgical facility.

By utilizing the Internet as a communication and procurement medium, PCX provides access to your inventory data from any PC connected to the Internet and meets the complete material management needs of facilities looking for visibility into your supply chain.

Key PCX Features

Order Management – Using PCX’s infrastructure to connect multiple suppliers using a single connection point, allows participating vendors and customers to work more efficiently together. Purchasing managers will quickly see how the increased automation will help with early discrepancy solution and better decision making.

Purchase Order Management – By submitting your purchase orders to participating vendors within the PCX portal, you can streamline your ordering process while improving speed and accuracy. The PCX portal will automatically route the purchase orders to the appropriate vendors. This will allow more time to focus on day-to-day activities versus the manual method of contacting each vendor to submit your orders.

Purchase Order Acknowledgement – The PCX portal provides instant access to order acknowledgements, backorders, items on hold, rejected products and price discrepancies. The portal gives the user a central point to manage order confirmations and discrepancies.

SourcePlus PCX
An Advanced eProcurement Portal

- Reduces supply inventory levels & therefore carrying costs
- Increases accuracy around the ordering to pay process
- Saves staff time
- Increases service levels throughout the facility
- Automates a significant portion of procurement activities
- EDI access to all vendors participating in the SourcePlus PCX program
- Integration of vendor inventory data into Source Medical application
