

## Online patient medical history saves time and costs for surgical facilities and provides greater convenience for patients

Increasing efficiency, streamlining workflow and improving patient care - top priorities for every surgical facility. What makes these advances possible? Frequently, it is the application of new, innovative technologies.

Through a partnership with Medical Web Technologies (MWT), SourceMedical now offers SourcePlus Passport™. This unique, online solution allows patients to submit their complete medical information to a facility prior to their procedure. This turns lengthy nursing pre-op phone calls into a single, short phone call to simply verify a patient's information. The result: better patient satisfaction, greater staff productivity, and documentation that is legible, uniform and complete.

**Easy for Your Patients** - SourcePlus Passport is easy for patients to use – by taking the complex task of submitting a complete medical history and breaking it down into a series of small steps for a patient to complete: allergies, medications, etc. Any patient who can send an email or order a book online has the ability to create a SourcePlus Passport.

**Easy for You** - SourcePlus Passport is easy for facilities to use – all that is required is an existing SourceMedical application (Vision, AdvantX or SurgiSource) and a computer with an Internet connection. There are no additional hardware or software products to install. Most facilities are “up and running” in less than two weeks, and training can be completed online in a morning.

### SourcePlus Passport provides your facility with:

- Substantial cost and time savings – allowing your staff and nurses to focus on patient care rather than on routine data gathering and entry
- Better communication with patients and surgical offices
- Fewer delays and cancellations
- Less wasted time between cases
- Improved documentation that is legible, accurate, uniform, and is formatted for the unique information needs of registration staff, nurses, anesthesiologists, surgeons, and physicians.
- Greater patient convenience and satisfaction.
- Supports your facility in meeting CMS requirements by providing patients with online notification of patient rights, ownership disclosure information, informed consents, and other government mandates.

### SourcePlus Products and Services: Solving problems and boosting performance

The SourcePlus suite includes a wide array of add-on modules, products and services that add value to our core information management systems; further enhancing facility management, clinical efficiency, quality and profitability. With our integrated SourcePlus Products, your surgical facility can leverage the best tools available to ASCs and surgical hospitals.

Benefits include:

- Improve service to patients and physicians
- Optimize reimbursement and cash flow
- Improve clinical documentation
- Boost staff productivity
- Reduce staff and supply costs
- Improve decision-making
